

## Stars:

They view me sundown till sunrise,  
Their glow pervades my observant eye.  
When a shooting star is in the galaxy,  
the world transforms into pure tranquillity.

Some cluster to create Gemini, Libra, Virgo,  
Sagittarius, Pisces, Capricorn, Scorpio.  
The inky midnight sky is their canvas,  
They are fluorescent throughout the blackness.

Through my bedroom window, I still see the shimmer.  
I gaze back at the Incandescent glimmer,  
As I close my eyes, I do not count sheep,  
I count the stars orbiting the galaxy.
